

JOÃO MOTA

SOFTWARE ENGINEERING STUDENT

(+351) 936236559 | jpmota99@gmail.com | jppm99.github.io

PROFILE

Software engineering student and enthusiast, looking forward to learn and build new things. Currently looking for ways to apply and improve what I have learned.

EDUCATION

UNIVERSITY OF PORTO FEUP

- Integrated master's in informatics and computation engineering 2017 - Present
-

PROJECTS

Predicting the odds for football matches

<https://github.com/jppm99/IART/blob/master/T2/src/notebook.ipynb>

- This project aims to predict the betting odds of football matches using historical data and information about the teams and their players
- We used multiple supervised learning algorithms to get the best results, such as decision trees, neural networks, k-nearest neighbor, and support vector machines
- Some of the technologies used: Python, Jupyter notebook, Scikit learn

A platform for aeronautical medicine

(still in development)

- The goal of this project is to provide aeronautical doctors a way to share and store information about their patients, allowing for easier fraud prevention
- Some of the technologies used: ReactJS, MongoDB, NodeJS, Google Cloud Platform

Auction website

(private repository)

- In this project we built a webapp that allows users to sell and buy antiques through auctions
 - Some of the technologies used: PHP, Laravel, PostgreSQL, Docker
-

SKILLS

Software Python, C++, C, Java, TypeScript, MongoDB, JavaScript, SQL, ReactJS, NodeJS, PHP, ...

Languages Portuguese (native), English (fluent)
